

Tsarevich Puppy Contract

1. If any pre-existing defect is verified by a licensed veterinarian within 10 days of the puppy's pickup, the breeder will reimburse the payment of the puppy and take the puppy back. All paperwork belonging to the puppy would be required to be given back to the breeder. The buyer will have the choice of picking the puppy up once the issue has been resolved or opt out. Breeder must be notified *immediately* if a health issue should arise after pickup. If the breeder is not notified immediately, the guarantee becomes null and void. No veterinary fees will be incurred by the breeder without prior approval, and **before** any procedure is performed. No veterinary charges will be the responsibility of the breeder if the puppy's condition was not pre-existing

*Please be aware, upon bringing the puppy home, a puppy can experience stress due to the separation from littermates and the dam. The puppy might not be as willing to play, eat and interact with you. It needs time to get used to its new environment and family. Symptoms of stress can include loss of appetite, loose stool, lethargy. If symptoms persist for more than 72 hours, the breeder must be notified immediately.

2. A licensed veterinarian must verify and specify the condition of point #1
3. Vaccinations are current to age of the puppy upon pickup. It is the responsibility of the buyer to finish the round of vaccines. The contract becomes null and void if the buyer does not continue with the vaccine schedule hence, breeder will not be responsible for any issues that should arise in connection with this.
4. The health guarantee is effective to the original buyer of the puppy, it is non-transferable.
5. AKC registration will be provided to the buyer upon proof of spay/neuter. Recommended age for spay/neuter is no earlier than 18 months. According to a study from UC Davis in 2020, various cancers, hormonal imbalances, hip dysplasia and more have all been proven to have a connection to the early spay/neuter of dogs. If a puppy is spayed/neutered before the age of 12 months and is diagnosed with heart issues or hip/elbow dysplasia the guarantee becomes null and void.
6. Breeder has provided any and all information on how the puppy was raised and the buyer has all the rights to inquire for more information.
7. If under any circumstance, the buyer can no longer keep the puppy, the breeder must be notified and the puppy be returned to the breeder. No questions will be asked, life happens.
8. The buyer will keep the puppy as a household pet, provide adequate food and water, shelter, fenced yard, medical care if needed and treat the puppy as a family member.

Breeder's Promise and Guarantee

- 1. Upon pickup, it is the responsibility of the buyer to purchase pet insurance (we recommend Trupanion). The health guarantee becomes null and void if there is no pet insurance upon pickup. If the buyer cancels the pet insurance anywhere from the time of pickup to the 1st birthday of the puppy the guarantee becomes null and void.** This point should not be taken lightly. Insurance has saved many pet owners from having to make very devastating decisions for their puppy.
- 2. Each puppy going to a new home will be offered a 1 year health guarantee from its DOB against genetic defects. Any suspected issues within this time period should be addressed to the breeder and the puppy *must* be returned to the breeder for further diagnostics. No veterinary fees will be the responsibility of the breeder without prior approval of the breeder and *before* any diagnostic procedures or treatments begin. If this point is broken, the health guarantee becomes null and void.**
 - 1. This guarantee does not include viral illnesses, infections, improper bites, ingestion of foreign objects, food poisoning, chemical reactions or physical injury. If a hernia is found to be genetic, the breeder will cover the cost of the hernia removal at the time the puppy goes in for a spay/neuter**
- 3. All puppies have been vaccinated at the age of 8 weeks upon leaving the breeder. Breeder has provided the buyer with paperwork for proof. It is the sole responsibility of the buyer to protect the puppy from any vaccine-preventable viruses after leaving the possession of the breeder.**
- 4. All puppies have been dewormed at the age of 2,4,6 and 8 weeks of age. Breeder has provided the buyer with paperwork for proof. If the buyer wishes, the breeder will send the puppy home with additional rounds of dewormer free of charge.**

* Occasionally a mother dog can be an asymptomatic carrier of giardia and/or coccidiosis. This form of parasite can be picked up on a walk, from unfiltered/standing bodies of water, dog-to-dog, brought into the yard by a foreign animal and etc. If a licensed veterinarian diagnosis either of these parasites in a puppy within 10 days of pickup, the breeder will either: 1. Provide the buyer with medication or 2. Cover medication fees from the buyer's veterinarian.
- 5. No puppy, to the knowledge of the breeder or veterinary doctor, has any health problems. Otherwise the breeder would withhold the puppy until a clear understanding of the problem and its elimination.**
- 6. Each puppy will be coming with AKC registration. The registration will be withheld for puppies that go to pet homes until the spay/neuter of a puppy has been completed at an appropriate age (recommended age is at least 18 months). The proof should be presented to the breeder along with the information of the LEGAL and licensed veterinary doctor. Limited or Full registration should be discussed prior to pickup and is solely the responsibility of the new family. The breeder has the right to refuse breeding rights to any person.**
- 7. The breeder NEVER deletes any conversations between themselves and the new family.**

8. ADDITIONS TO THE CONTRACT FROM THE BUYER SHOULD BE MADE AND APPROVED BEFORE PICKUP
